FERMAX

MARINE

by FERMAX

The **stainless steel resistance** combined with Fermax's **technology and design**.

MARINE is the **vandal-proof** audio and video door entry panel from FERMAX. It is made of **316L stainless steel** and it has 2,5mm width.

MARINE is one of the most **resistant** outdoor panels because of its high quality, on both materials and production processes.

MARINE^{elite}

by FERMAX

A door entry panel for those projects requiring a **higher level of security** or places with adverse or **extreme climate conditions**.

Thanks to the stainless steel with **IP54 IK09** protection, MARINE is a door entry solution **able to resist in corrosive and wet environments**.

Operating temperature: [-25°C, +55°C]

Within the MARINE line, the exclusive, bespoke range **MARINE ELITE** allows a total freedom of **imagination and creativity**: any **colour**, **size**, **composition** or **laser marking**.

FERMAX

Fermax has a **laser-engraving** machining line for marking MARINE panels.

For every project, a different **size and composition** depending on the requirements.

MARINE *elite*

by **FERMAX**

Bespoke outdoor panels offer an additional value and an **exclusive service** for the most prestigious and demanding architecture projects.
